Summary

An experienced Ruby on Rails, ReactJs, Node, and Angular Engineer with exceptional skills in developing scalable and efficient web applications and hybrid mobile apps. I am a critical thinker who possesses strong analytical and communication skills. I'm very comfortable on both the front and back ends, have experience with trendy JS front-end frameworks. I can help a project start from scratch, build new features, or help configure your server. Feel free to message me and we can talk about my qualifications and your project needs.

Experience

Senior Software Development Engineer

Tech Dots

Mar 2019 - Present (3 years 7 months +)

Designing and maintaining small to mid-sized features, managed some projects as well. Some of the modules in which I participated were: Pre-authorization/cancellation/Disputes Resolution/Card Transactions/Settlement/Balance Management/multi-wallet support for different kinds of currencies including Crypto/IVR setup/Microservices architecture backed by Sinatra base API.

My Projects:

- Apto Payments - (Ruby/Sinatra/Angular) Card issuance service based company that helped Coinbase, Uphold, Globalid grow and then acquired by Globalid itself
- Syncta - (Ruby on Rails, iOS, Android) SaaS for backflow testers and transforming towards IoT industry, acquired by watts water \$3 billion valued parent company
- Diverst - (Rails/Reactjs/AWS/Psql) Diversity, equity and Inclusion ERG Software - Bootstrapped and growing at great pace with clients such as Dell, Neilson, Microsoft etc.

Lead Software Developer

Syncta

Aug 2017 - Jul 2019 (2 years)

Started my career as a Sr. Software engineer then was promoted as a lead Developer to deal with IoT based project that involves Azure IoT hub and hardware integration. As a lead, I'm responsible for site deployments, production support, PR reviews, and feature planning & architecture design for the given project.

My Projects:

- Wellpay - (Ruby on Rails. Reactjs) helping people pay their medical bills easily on the go! - Funded and growing

- ExpressVPN - (Ruby on Rails) One of fastest and best VPN service on planet Earth! - Bootstrapped and growing at a great pace!

Senior Software Engineer

Matrix Solutions

Feb 2016 - Mar 2017 (1 year 2 months)

Worked as full-stack developer on company projects:

Projects:

- Tenna - Cost-effective way to track and manage your entire inventory. Truck Routes with ReactJS(routific API), Twilio, Elasticsearch custom implementation followed by BDD (RSpec - Cucumber - Capybara).

- MyBestHelper - Job Search Platform. Worked with team on modules Job creation, search(elasticsearch), API development, applicants profile /job creation, crone jobs others...

Education

University of Engineering and Technology, Lahore

Bachelor of Science - BS, Computer Software Engineering

Oct 2014 - Nov 2018
